

Wrocław, dated 13.05.2026

**Questions and answers to the content of the Enquiry for Quotation No. DZ/05/05/2026
of May 11, 2026**

in the procurement proceedings for the purchase and delivery of a complete seismic instrumentation for continuous 6-DoF seismic measurements, including software and technical support, as part of the project entitled: "Coupled Rotational–Translational Ground Motion Effects on the Dynamic Stability of Earth Structures: A Hybrid Seismomechanical Framework" financed by the National Science Centre

Due to the fact that the Ordering Party has received questions regarding the above-mentioned inquiry, the Ordering Party provides the following responses:

Question no. 1:

Thank you kindly for sending through this RFP, please consider this email as confirmation of receipt.

Upon review of the specifications, we can see that the request is for a relatively low sensitivity system. We have a product X, which is an order of magnitude more sensitive in terms of rotation and significantly quieter and broader band for the translational channels.

I wanted to enquire about the estimated budget for this procurement? We would very much like to take this opportunity to promote and offer our X system, however it would be useful to know a ROM estimate of the budget to inform us on the best way to proceed.

Answer no. 1:

The Contracting Authority thanks you for confirming receipt of the Request for Quotation and for providing information on the technical capabilities of the proposed system.

The Contracting Authority informs that, in accordance with the Request for Quotation, the only criterion for evaluation of offers is the price. At the same time, in order to ensure the transparency of the procedure and equal treatment of all potential Contractors, the Contracting Authority cannot disclose the amount allocated for the implementation of the subject of the contract or the estimated budget of the procurement.

Therefore, the Contracting Authority kindly requests that you prepare and submit a price offer in accordance with the requirements specified in Request for Quotation No. DZ/05/05/2026 dated 11 May 2026 and its appendices.
