

Wrocław, dated 25.05.2026

**Questions and answers to the content of the Enquiry for Quotation No. DZ/05/05/2026
of May 11, 2026**

in the procurement proceedings for the purchase and delivery of a complete seismic instrumentation for continuous 6-DoF seismic measurements, including software and technical support, as part of the project entitled: "Coupled Rotational–Translational Ground Motion Effects on the Dynamic Stability of Earth Structures: A Hybrid Seismomechanical Framework" financed by the National Science Centre

Due to the fact that the Ordering Party has received questions regarding the above-mentioned inquiry, the Ordering Party provides the following responses:

Question no. 1:

In connection with the announced request for quotations No. DZ/05/05/2026, I would like to ask whether the Contracting Authority allows the training on the operation of the supplied devices to be conducted online, while maintaining the required number of participants and the required training duration?

Answer no. 1:

Yes, the Contracting Authority allows the training on the operation of the delivered devices to be conducted online, provided that the required number of participants and the required training duration are maintained.
